

# How to add web clips to Iphone

If you want fast access to web pages on your iphone you should add Web Clips to iphone. This will allow you to save any web page on your home page and access it with a press of your finger. Just follow the simple steps below and you will be adding web clips to your iphone!

## Instructions

### Things You'll Need:

1. To add web clips to iphone:
  2. First you will need to open your safari application and pull up a web page.
  3. Next you will need to press on the plus sign in the bottom center of your page.
  4. This will pull up three options for you to either add the link as a bookmark, add the link to home screen, or mail link to this page. To add the link as a web clip to your iphone you should press the add to home screen button.
  5. This will pull up a button image of the web page you are saving and a text box for you to type in the name you would like to save your web clip as. Keep in mind if your web clip name is longer than 10 characters it will be abbreviated on the home screen.
  6. Once you have entered the name simply press the add button at the top right side of the iphone screen.
  7. The web clip is now saved on your iphone home screen.
  8. To delete web clips on iphone you will need to press and hold the icon until it starts to shake. Once they begin to shake remove your finger and press the "X" that appears at the top left of the application icon image. A delete conformation box will pull up to confirm you would like to delete the web link. To confirm simply press delete, if you changed your mind press cancel.
- Iphone
  - internet access
  - web page

## Tips & Warnings
